

CHURCH SPECIALTY PANELS

SPC Series

The SPC Series consists of the SPC3, SPC4, SPC5X7, and SPC5X12. The SPC3 provides sound system control for either the Ivie 800 series or IRP Voice-matic series of mixers with a lighted pushbutton switch for system on/off, a momentary switch for raising and lowering the pulpit, and a volume control pot. The SPC4 provides the same controls as the SPC3 with the addition of a switched volume control pot for satellite audio. The SPC5X7 is a 5" X 7" blank that can be used, if needed, in the installation of the pedestal controls. The SPC5X12 is a 5" X 12" blank for use in installing the pedestal controls. When ordering you will need to specify whether the SPC3 or SPC4 are for an IRP or Ivie Mixer.

Pedestal Controls

Mounting Plates

Pulpit Controls

Category 5 Interface

CP-2 Control

The CP2 mounts on the side of the pulpit. The CP2 is a dual gang plate with two toggle switches for chapel and cultural hall on/off, and a 10K volume control pot. The wallplate is a polyurethane coated stainless steel plate with gold lettering. Hook-up is accomplished with pig-tail wires from the switches and pot.

170 Blank

The 170 Blank is a 13.5" X 13.5" blank wallplate used to cover the hole left by a 170 In-Wall Amplifier when it is removed from a building. The wallplate has corner mounting holes, and is covered with an off-white epoxy based paint. The 170 Blank can also be used as a mounting base for custom electronics.

Category 5 Interface Panels

The Computer Interface (CI) Panels provide category 5 / RJ45 based DATA and AUDIO ports on single and dual gang wallplates. The A/V Interface Panels provide category 5 / RJ45 ports for PROJECTOR (AV1) or A/V and COMPUTER (AV2). The wallplates are made of high impact plastic with gold lettering.
