

MSC-E TV/VIDEO Jacks

The MSC-E provides a video jack and an empty hole for mounting a Blonder-Tongue or equivalent TV tap in a single-gang decora style lexan plastic panel. The MSC-E is an easy way to interface video and television signals. The video connector is a female RCA on the front side of the panel, and a female F type on the backside of the panel. The module mounts into a standard single-gang electrical box (*not provided*), and is finished off using a matching decora coverplate (*see HPS-1*). Modules are available in Brown, Ivory or White.
