

MSC-G Dual Male Microphone Jacks

The MSC-G is a microphone input module with two 3-pin male XLR connections in a single-gang decora style metal plate. The MSC-G provides a rugged, yet good looking, panel for inputting microphone signals into an existing sound system. The module mounts into a standard single-gang electrical box (*not provided*), and is finished off using a matching decora coverplate (*see HPS-1*). Connections on the sound system side of the microphone connector are made via screw terminals. Modules are available in Brown, Ivory or White.
