

MSC-M Single Female Microphone Jack

The MSC-M is a microphone input module with a single 3-pin female XLR connection in a single-gang decora style metal plate. The MSC-M provides a rugged, yet good looking, panel for inputting a microphone signal into an existing sound system. The module mounts into a standard single-gang electrical box (*not provided*), and is finished off using a matching decora coverplate (*see HPS-1*). Connections on the sound system side of the microphone connector are made via screw terminals. Modules are available in Brown, Ivory or White.
