

MSC-R Remote Control Connector

The MSC-R provides an 8-pin female DIN connector for connecting a sound system remote control unit. The connection is built on a single-gang decora style lexan plastic panel. The module mounts into a standard single-gang electrical box (*not provided*), and is finished off using a matching decora coverplate (*see HPS-1*). Connections on the sound system side of the on/off switch are made via screw terminals. Modules are available in Brown, Ivory or White.
