

MSC-Q

Microphone Source Switch (non-lighted)

The MSC-Q is a true DP3T switch used for switching three separate amplified microphone signals. The standard MSC-Q comes labeled as Chapel A, Chapel B and Local, but custom labeling is available. The module mounts into a standard electrical box (*not provided*), and is finished off with a matching decora coverplate (*see HPS1*).

Connections on the backside of the switch are made via pigtail wires.

The MSC-Q module is available in brown, ivory or white.
