

## **BLU-CIF2 INTERFACE BOARD**

The BLU-CIF2 Interface Board provides a simple wiring interface for the BLU-CC, BLU-CP, BLU-CS, BLU-IR and BLU-SV (8) modules to the BSS London Series of Digital Signal Processors for LDS chapel installations. It provides LED status indicators, the appropriate connections for each of the controls, and relays for triggering the turn on of external equipment and switching of speaker level signals for audio in overflow areas. The BLU-CIF2 is used for dual chapel or Heritage 09T configurations.

The connections on the BLU-CIF2 consists of 3.5mm euro-style blocks for existing wiring, and RJ-45 connectors for Cat5e wiring. It also ships with four pre-fabricated cables for connecting it to two DSPs. The board is powered by an external 24VDC table top power supply (included with each unit).

### Specifications

Dimensions . . . . . 7.0" X 10.0" X 2.0"  
Weight . . . . . 1.3 lbs.  
Shipping Weight ( w/cables & pwr. supply) . . . . . 2.6 lbs.  
Power Requirements . . . . . 24VDC @ 1.67A  
Relays . . . . . 24VDC / 400mW / Non-Latching
