

BLU-CP

BSS PULPIT CONTROL

The BLU-CP is a pulpit control designed to work with the BSS London Series of Digital Signal Processors for LDS chapel installations. It provides controls for turning on and off, and setting the volume level of the sound system, as well as adjusting the height of the pulpit in the chapel.

Connections on the backside of the pulpit control consist of a 3-pin Euro style connector for the pulpit motor, and an RJ-45 connector for the sound system controls.

Specifications

Dimensions 2.5" X 6" X 1.25"
Weight 2.7 oz.
