

PA ADAPTER MODEL EJ-2Plus

compact & lightweight

no batteries or
external power required

audio content for
presentations made easy

audio interface for
laptop computers

The Model EJ-2Plus is a compact multi-input adapter that accepts line level output from either a laptop computer, audio cassette player, CD player, DVD player, or video tape player for insertion into a P.A. system. It is designed to provide the user with an easy to use, easy to carry, high quality interface for the audio content of a presentation, while providing the necessary matching and isolation for the existing PA system.

The EJ-2Plus is a passive device, so no batteries or external power sources are required for operation.

The EJ-2Plus includes cables with a 3.5mm stereo plug and a pair of RCA plugs for making connection to your laptop or other audio/video device, and a standard 3-pin XLR for connection to the microphone input of an existing sound system. It also comes with a nylon carrying case. An instruction card comes stored in a pocket of the carrying case.

The EJ-2Plus does have its' own volume control. It also comes with a hum switch, which allows you to disconnect the circuit from ground if you encounter a humming or feedback problem when you connect to an existing P.A. system.

Specifications:

Warranty:

Emtech Electronics, Inc. warrants the Model EJ-2Plus for a period of two years, from original date of purchase, against defects in parts and workmanship. If a defect occurs, the unit will be repaired or replaced, at our option, free of all charges if delivered prepaid to the factory. Warranty does not extend to finish, appearance, abuse or defects due to the misuse or operation under other than specified conditions, nor does it extend to incidental or consequential damages. Repair by anyone other than Emtech will void the warranty,
