

## **EJ-2 Multi-Input Adapter**

The EJ-2 is an audio adapter that allows you to connect the audio output from your laptop computer or other audio device to the input of an existing public address system. All the cables are provided for connecting the audio from your laptop, cassette player, CD player, DVD player, or video tape recorder to the microphone input of a PA system. The EJ-2 is the ideal companion for an individual making multi-media presentations. It is small and lightweight so it can travel with you wherever you go.

**Instructions:** Simply make a connection between the audio output connector(s) of your laptop or other audio device using either the 3.5mm stereo plug or RCA plugs attached to Inputs A & B on the EJ-2, then plug the 3-pin XLR connector into any existing microphone input of the PA system. You are now ready to make your presentation using the EJ-2.

Volume control for the audio can be provided via either the controls on your laptop or audio device, or through the volume controls associated with the existing PA system. The EJ-2 is a passive device. It makes use of the power within the audio signal itself, so you will never need batteries or an external power source while using the EJ-2.

### **Specifications:**

Inputs: unbalanced line level audio signals

Output: transformer balanced low-impedance microphone level signal

Frequency Response: 20Hz to 20kHz

Size: 3.6"L X 1.6"W X 1.5"H

Weight: 13.5 oz.

### **Warranty:**

Emtech Electronics, Inc. warrants the Model EJ-2 for a period of two years, from the original date of purchase, against defects in parts and workmanship. If a defect occurs, the unit will be repaired or replaced, at our option, free of all charges if delivered prepaid to the factory. Warranty does not extend to finish, appearance, abuse or defects due to the misuse or operation under other than specified conditions, nor does it extend to incidental or consequential damages. Repair by anyone other than Emtech will void the warranty.
