

## MSC-M

### Single Female Microphone Jack

The MSC-M is a microphone input module with a single 3-pin female XLR connection on a single-gang decora style metal plate. The module provides a rugged, yet good looking, panel for inputting microphone signals into an existing sound system. It mounts into a standard electrical box (*not provided*), and is finished off with a matching decora coverplate (*see HPS 1*).

The connection on the backside of the XLR connector is a euro style terminal.

The MSC-M module is available in brown, ivory or white.

## MSC-MG

### Gold-plated Female Microphone Jack

The MSC-MG is the same microphone input module as the MSC-M, but the female XLR connector is gold-plated.
